

Heaters

Digital Heater

Digital Heater incorporates advanced digital micro-processing technology.

- Monitors and displays real time water temperature via a "ClearView" LED display.
- Digitally adjustable for precise temperature setting.
- Equipped with sophisticated "Temperature Recall" micro chip.
- Fully submersible.
- Toughened glass heater element.
- Reinforced plastic heater element guard.
- Temperature set range: 20°C - 34°C [tolerance $\pm 1^\circ\text{C}$].
- Thermal cut-off.
- Slimline ergonomic design.
- Simple installation using mounting brackets and suction cup clips supplied.
- 1.8m power cable.

Digital Heater

Code	Product	Aquarium (l)	Dimensions (mm)
5755	Digital Heater 50	60	262 x 36
5756	Digital Heater 100	120	336 x 36
5757	Digital Heater 200	240	338 x 36
5758	Digital Heater 300	350	418 x 36

Digitally adjustable

Clear View LED display

Optimum heat diffusion

1. Temperature setting button
2. ClearView LED display
3. Heating indicator light
4. Toughened glass heater element
5. Reinforced plastic heater element guard
6. Mounting brackets x 2
7. Securing suction cups x 2
