

# Dosing Systems

## Reef Easi Dose-Dosing Container

Dosing containers specifically designed for use in the balling method or for dose any liquid product from them in to your aquarium.

- Perfect for people who are limited with space inside their cabinets.
- The pipes are the correct size so ordinary aquarium air line can be pushed on to provide a secure grip straight from your dosing pump (we recommend silicone airline), or you can use RO pipe.
- The suction from the dosing pump doesn't allow any liquid to drip out when you remove the pipe complete with the lid.
- Professional look.
- Each vessel is easily cleaned and rinsed out.
- 4 sizes available.

## Reef Easi Dose-Dosing Container

Code	Product	Capacity (L)	Dimensions (mm)
9536	Reef Easi-Dose Dosing Container	1.5	107 x 107 x 172
