

Reef Pump Compact

500, 1500, 2500, 5000 and 10000

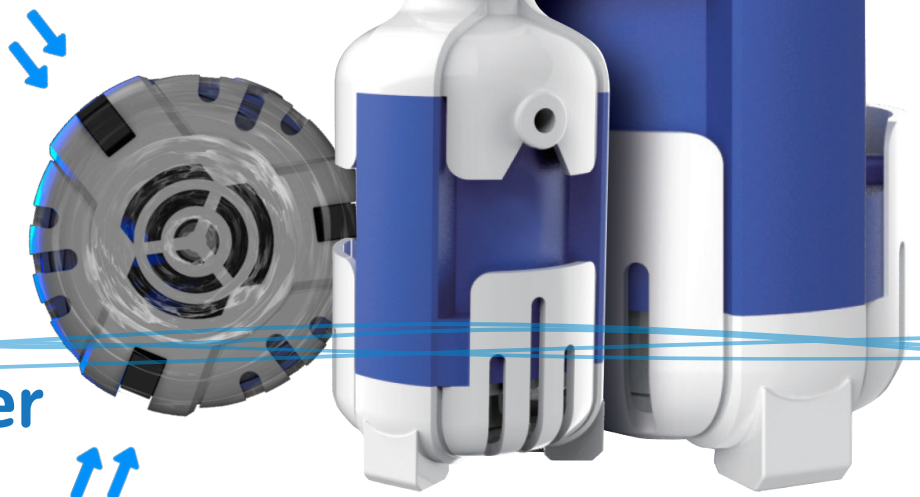

High quality, ultra-compact DC pumps suitable for salt and freshwater aquariums

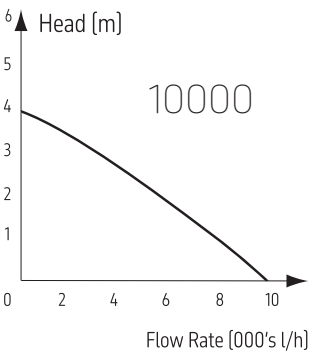

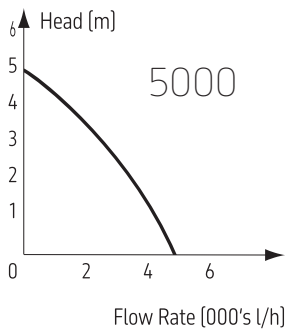

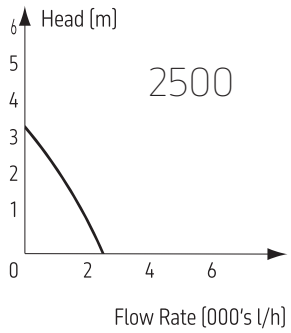

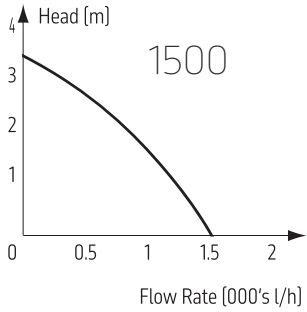

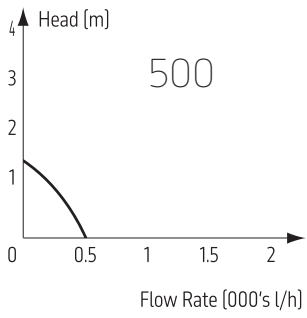

MAIN FEATURES:

- Unique **ultra-compact space-saving design** enabling easy installation in small aquariums and sumps where space is a premium
- Incorporates the latest electronic pump technology for **high power and flow rates combined with efficient energy consumption**
- **Base fed water intake** ensures small footprint and **ability to work in low level water**, perfect to help with water changes
- **Variable speed control with up to 10 different speed settings**, offering precise adjustment of water flow for optimum performance
- **Integrated 10 minute feed timer** to allow easy feeding
- Soft start feature to increase impeller life
- Incorporates a **unique self-cooling system** which channels water around the motor to ensure optimum operating temperatures
- Low voltage

**base fed so
works in**

low level water
