

Mechanical Filtration

Reef-Roller Manual Roller Filter

Advanced manual mechanical roller filter.

- Filters aquarium water down to 50 microns and replaces the need for high maintenance filter bag/filter sock systems.
- Precision engineered from the highest quality materials.
- Compact, space-saving design allowing easy installation in most sumps*
- Accessible parts - for easy removal and replacement of filter roll and simple cleaning.
- 45-metre long filter roll offering months of easy use [20m for Reef-Roller S].
- Filtering capacity: up to 50 microns.
- Simply wind on the filter roll material when it becomes clogged with detritus and waste.

*External mounting module may be required - sold separately.

Reef-Roller Manual Roller Filter

Code	Product	Max Flow Rate (l/hr)	Max Aquarium Size (l)	Dimensions (mm)
