

Protein Skimmers

Reef Skim Pro DC

High performance, professional protein skimmer incorporating an advanced, cone-shaped design.

- CNC precision engineered from the highest quality materials.
- Compact, space-saving design with integral pump allows easy installation in most sumps.
- Conical body design ensures the optimum water-to-air contact time and naturally encourages the unrestricted concentration of bubbles upwards towards the collection cup for intensive, efficient skimming.
- Patented bubble diffusion plate system ensures uniform dispersal of micro fine air bubbles across the entire skimmer column.
- The unique, needle wheel injection system has been developed specifically to ensure the perfect mix of micro fine air bubbles and water for optimum skimming.
- Unique, innovative air intake silencer offers precision adjustment of air flow into the skimmer for optimum performance and also allows simple connection to an ozone generator.
- User-friendly design, including a large, easy to remove collection cup with drain system, ensures all parts of the skimmer can be accessed for effortless maintenance and cleaning.
- 5 models available.

Reef Skim Pro DC

Code	Product	Suitable For	Peak Air flow (l/h)	Dimensions (mm)
9980	Reef Skim Pro 300 DC	aquariums up to 300l	250	140 x 110 x 445
9981	Reef Skim Pro 500 DC	aquariums up to 500l	300	185 x 165 x 435
9982	Reef Skim Pro 1000 DC	aquariums up to 1000l	800	210 x 200 x 510
9983	Reef Skim Pro 1500 DC	aquariums up to 1500l	1200	235 x 215 x 535
9984	Reef Skim Pro 2000 DC	aquariums up to 2000l	2500	290 x 280 x 595

Includes Compact DC Pump with variable speed control
